Senior Full-Stack AI Engineer

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 12+ years of professional IT experience designing, building, and deploying fault tolerant production applications, with specialization in Python backend engineering and modern AI/ML systems design. Proven capability leading cross-functional teams within IT Financial Services environments to develop internal intelligent Agentic Platforms. Deep technical expertise across LLM basics, advanced Retrieval-Augmented Generation (RAG) setups, semantic context-aware orchestration, and robust REST/GraphQL API boundaries. Expert in relational and NoSQL data modeling, event-driven systems engineering, and continuous deployment strategies under strict Agile methodologies. Skilled communicator with exceptional time management capacities, consistently bridging technical data science requirements with fluid frontend user experiences to deliver scalable corporate software assets.

EXPERIENCE

Charles Schwab

Feb 2024 – Present

Senior Full-Stack AI Engineer (Agentic Systems Lead)

Westlake, TX

- Served as a primary technical driver in the system design and implementation of an internal, intelligent Agentic Platform, orchestrating complex cross-functional alignments with product managers, data scientists, and UI designers.
- Architect and deploy scalable, fault-tolerant production workflows using Python and Node.js backend services, leveraging advanced concurrent execution blocks to process high-volume enterprise traffic reliably.
- Designed and optimized custom Retrieval-Augmented Generation (RAG) frameworks to fetch semantic financial contexts from relational PostgreSQL (via Drizzle ORM) and MongoDB repositories.
- Integrated core Large Language Models (LLMs) using AWS Bedrock, SageMaker, Google Vertex AI, and Gemini AI APIs to empower real-time context-aware chat automation and predictive insight flows.
- Built asynchronous, message-driven pipelines with Apache Kafka, RabbitMQ, and AWS Kinesis, maintaining strict systemic resilience and validation protocols against common processing faults.
- Lead active Agile/Scrum sprint workflows, leveraging Jira and Confluence for transparent item tracking, technical dependency documentation, and systematic status visibility.

Centene Corporation

Aug 2022 – Jan 2024

Senior Software Systems Engineer

Saint Louis, MO

- Engineered distributed microservices architectures and RESTful/GraphQL APIs using Python (Flask/FastAPI), Java, and Spring Boot, enforcing robust identity and access validation structures with OAuth 2.0 and JWT.
- Led the development of intelligent healthcare automation engines, using Python machine learning libraries and AWS SageMaker to train, evaluate, and launch predictive data analytics nodes.
- Designed backend integration layers and relational database optimization scripts using Python ORMs, schema configurations, and advanced indexing parameters to securely query dense information systems.
- Resolved complex data migration issues and production platform bottlenecks by incorporating GitHub Copilot workflows, reducing technical debt while accelerating automated code quality audits.
- Coordinated closely inside cross-functional Kanban/Scrum teams to guide multi-tasking efforts, ensuring compliance validation, unit testing, and scalable Docker/Kubernetes container orchestration.

Target

May 2019 – Jul 2022

Full-Stack Systems Engineer

Minneapolis, MN

- Designed and implemented highly resilient microservices and backend API modules utilizing Python, Node.js, and Spring Boot, systematically transitioning monolithic systems into scalable patterns.
- Optimized backend query execution paths and structural logic distributions across relational databases (PostgreSQL/MySQL) and NoSQL stores (MongoDB), ensuring sub-millisecond data persistence.
- Constructed real-time asynchronous streaming loops and batch file processors utilizing Node.js, Kafka architectures, and scheduled AWS Lambda cloud functions.

- Participated heavily in Agile sprint grooming, backlog estimates, and technical retro reviews, translating broad platform requirements into granular deployment schedules.

Boeing

Senior Full-Stack Engineer

Dec 2016 – Apr 2019

Arlington, VA

- Developed dynamic, responsive, and data-dense web solutions using Python, Node.js backend logic, and Java infrastructure, keeping close alignment with internal security compliance norms.
- Built securely isolated microservices instances using containerization with Docker, managing continuous integration pipelines inside automated Jenkins environments.
- Tuned relational query routing schemas and data indexing parameters across enterprise databases to accelerate complex structural retrieval states.

Autodesk

UI Software Engineer

Jan 2013 – Nov 2016

San Francisco, CA

- Collaborated across product teams to create user-centered interactive designs, building clean Single Page Application layouts backed by secure MySQL databases.
- Integrated legacy communication protocols and modern web service endpoints to establish reliable data synchronization mechanisms across back-end storage servers.

TECHNICAL SKILLS

Core AI & Core Tech : Python Engineering, Large Language Model (LLM) Basics, Retrieval-Augmented Generation (RAG), Agentic Architectures, AI Workflow Design, Semantic Context Ingestion

Systems Design & Engineering : Distributed Systems Architecture, Fault-Tolerant Production Design, Microservices, Event-Driven Patterns, API Design & Integrations (REST, GraphQL, SOAP)

Languages & Alternate Frameworks : Python, Java, JavaScript, TypeScript, Node.js, NestJS, Express.js, Spring Boot, Python Flask/FastAPI, HTML5, CSS3, Twig

Databases & Real-Time Analytics : Relational Databases, PostgreSQL, MySQL, NoSQL, MongoDB, Neo4j, Apache Kafka, Elasticsearch, Redis, AWS Athena, Power BI

DevOps & Enterprise Tools : Agile Methodologies, Scrum, Kanban, Jira, Confluence, Microsoft Office, Microsoft Visio/Draw.io, Docker, Kubernetes, Terraform, Jenkins, Git/GitHub, GitHub Copilot

EDUCATION

The University of Southern Mississippi

Dec. 2013

Master of Science in Computer and Information Sciences

Parul University (Parul Institute of Technology)

May 2012

Bachelor of Science in Computer Science
